

Velda Rose Gardens Countryside Residents

As a result of our web site, we can offer any resident a free email address.

This address would be of your choosing. For instance, I have set up my own as knelson137@vrgcs.org.

The office at the club has been set up as (vrg_cs@vrgcs.org).

There is now a link on our web site to the free mail site.

You would supply us with the email address you want to use. We would set it up for you with a default password. After it is set up and you are notified, you would then log into the mail system and change the password to whatever you wanted it to be, so that only you would know the password.

This is a web based email system, such as Gmail or Yahoo Mail, so you would not need to have an separate email program on your computer.

If you are paying for a separate email system such as AOL etc. and buying your internet service from COX or CenturyLink etc, this would save you the cost of paying for a separate email service. This email address could be used anywhere that you have access to the internet.

The web hosting company allows us 150 free email addresses with the cost of hosting our web site.

If anyone is interested in setting up an email address please contact the office or myself for further information.

Ken Nelson
